 Open to Remote

.NET Full Stack Engineer with 4 years building production FinTech systems including EBICS banking integrations, ISO 20022 CAMT/PAIN payment modules, CSR budget portals and real-time treasury platforms for Indian and Swiss clients. I also have hands on experience with SaaS platforms, from the inception of the project with architecture setup throughout Docker-based production deployments. I work asynchronously across international time zones and am seeking remote .NET or full stack roles in FinTech or SaaS.

TECHNICAL SKILLS

- **Backend:** .NET 6 / 8 / 10, C#, ASP.NET Core Web API, Entity Framework Core, Dapper, Hangfire, SignalR, WebSockets, LINQ, RESTful APIs Design, CQRS, MediatR, FluentValidation
- **Frontend:** React, TypeScript, Next.js, jQuery, Blazor WASM, React Native
- **Databases:** SQL Server, PostgreSQL, Redis, Stored Procedures, Database Indexing, Query Optimization
- **DevOps & Infrastructure:** Docker, VPS Deployment (Nginx, SSH), GitHub Actions CI/CD, Firebase CI/CD, AWS S3 & Lambda, Azure Blob Storage, Serilog, OpenTelemetry
- **Authentication / Authorization:** JWT Authentication, OAuth2, .NET Identity, Role-Based Access Control
- **Architecture:** Clean Architecture, Modular Monolith, Multi-Tenant SaaS and Database, CQRS, Design Patterns (Repository Pattern, CQRS, Mediator, Factory, Decorator, Unit of Work)
- **Integrations:** EBICS, CAMT/PAIN (ISO 20022), Microsoft Graph API, SharePoint Webhooks, Firebase APIs, OpenAI APIs, OpenAPI / Swagger
- **Practices:** Agile (Scrum, Kanban), Code Reviews, Unit Testing (xUnit / Vitest), Git (GitHub / Bitbucket), Jira

WORK EXPERIENCE

Tekkon Technologies

May 2024 – Present

Full Stack Developer

Kathmandu, Nepal

Project: Softcash (Real-Time Treasury Management Portal)

- Partnered with an Australian / Swiss FinTech client to architect and deliver a production-grade treasury management platform handling real-time FX operations and cross-border payments.
- Integrated EBICS protocol and automated exchange rate synchronization via Hangfire background jobs.
- Engineered CAMT (Cash Management) and PAIN (Payment Initiation) file generation modules, eliminating manual reconciliation by >60% and improving payment processing reliability.
- Developed a real-time payment event notification system using SignalR, delivering treasury workflow alerts to active users within 200ms of backend state changes, replacing a polling interval of 30+ seconds and eliminating delayed reconciliation triggers.
- Implemented SharePoint and Microsoft Graph API integration using webhooks and delta queries to automate PAIN file delivery, batch payment retrieval, and payment status synchronization.
- Applied CQRS pattern with MediatR for command and query separation across payment processing pipelines, improving code maintainability and testability.
- Implemented 40+ automated unit tests for treasury, and reconciliation workflows using xUnit for backend APIs and Vitest for frontend components, improving release reliability and regression coverage.
- Developed a configurable dashboard system with drag-and-drop widget layout using React Grid Layout, allowing users to customize, resize, and persist their own dashboard views across sessions
- Implemented cut-off time enforcement for payments, restricting submissions based on configurable timezone schedules and automatically classifying payments as urgent or non-urgent based on the payment's type and configuration with respect to the bank's processing window.
- **Production URL:** [Softcash AG](#)

Codeology

May 2023 – May 2024

.NET Developer

Kathmandu, Nepal

Project: AXIS Bank CSR via Microware (Banking & CSR Budgeting Platform)

- Developed and delivered a client-critical banking CSR system for Axis Bank with annual budget planning and budget requirements across 50+ partner organizations.
- Conducted code reviews enforcing Repository Pattern and database-first architecture with strict separation across layers, reducing cross-layer coupling and enabling independent unit testing of business logic.
- Designed role-based workflow engine handling multi-stage proposal submissions, approval matrix, and cash flow monitoring, reducing manual intervention across budget cycles.
- Replaced ORM-heavy reporting queries with optimized SQL Server stored procedures, reducing report generation times from ~15s to under 2s.

Innovate Tech

September 2022 – April 2023

.NET Developer

Kathmandu, Nepal

Project: My Second Teacher (EdTech Platform)

- Successfully migrated EdTech application from .NET 2.1 to .NET 6 on an end-to-end basis with production release, resolving compatibility issues, package versioning conflicts, and third-party API dependency breaks.
- Optimized critical database queries, reducing query execution time by 40% improving API response times.
- Integrated AWS S3 Bucket and Lambda functions for scalable file storage and serverless processing.
- **Production URL:** [My Second Teacher](#)

FREELANCE & CONSULTING PROJECTS

Gridforce (Recruitment and Talent Pool Platform)

September 2025 – December 2025

- Developed core recruitment workflows including OpenAI-powered resume parsing, candidate pipeline management, interview lifecycle tracking and dynamic resume rendering.
- Successfully migrated 15,000+ legacy recruitment records from MySQL to PostgreSQL, implementing data transformation, validation, and reconciliation processes to ensure data integrity.
- Implemented Redis caching layer for candidate pipeline queries, reducing repeated database reads on high-frequency recruitment dashboard views.
- **Production URL:** [Gridforce](#)

Clock Bee (Multi-Tenant SaaS HR Platform)

June 2025 – August 2025

- Secured multi-tenant API surface using JWT authentication and OAuth2, enforcing tenant-scoped access.
- Designed and implemented a schema-per-tenant multi-tenant architecture with dynamic middleware-based tenant resolution and EF Core, delivering full database isolation and horizontal scalability.
- Engineered core HR modules including shift scheduling, timesheet tracking, payroll summaries, leave approval workflows, and real-time FCM push notifications.

Connect CMS (Training & Skill Development Platform)

July 2024 – December 2024

- Led a cross-functional team of 5 members with UI/UX designers, developers and QA through full delivery of a training management platform, coordinating across design, engineering, and quality assurance.
- Delivered training lifecycle modules including class scheduling, digital signature-based attendance, resource management, and personality and SWOT assessment workflows.
- Developed automated 360° inspection workflows that distributed evaluation tests to a candidate's peers, supervisors, and juniors, capturing pre-, during-, and post-training performance data.
- **Production URL:** [Connect CMS](#)

EDUCATION

London Metropolitan University

March 2021 – December 2023

Islington College - BSc (Hons) Computing

Kathmandu, Nepal

- Graduated with First Class Honors achieving 79.95% and awarded the AAA Scholarship.
- Served as a Student's Academic Representative (StAR), bridging communication between students and faculties and supporting peer learning.
