Given proper time, resources and motivation, I can do anything.

WORK EXPERIENCE

Tekkon Technologies

May 2024 – Present

Full Stack Developer

Kathmandu, Nepal

- **Project:** Softcash
 - Collaborated with Australian FinTech firm to deliver a real-time treasury management platform.
 - Implemented FX services integration via EBICS and automated exchange rate updates using Hangfire ensuring **100%** accuracy of financial data for customers.
 - Developed modules to generate and process CAMT (Cash Management) and PAIN (Payment Initiation) files, automating payment initiation and reconciliation workflows.
 - Build a real-time notification system to track critical payment events and backend-driven data pooling via SignalR to ensure users receive up-to-date treasury workflow alerts.
 - Reduced manual reconciliation efforts by **>60%** and improved payment processing reliability.
 - *Technologies Used:* .NET Core 8, React & Typescript, Hangfire, SignalR
 - *Enterprise URL:* [Softcash AG](#)

Codeology

May 2023 – May 2024

Associate Team Lead

Kathmandu, Nepal

- **Project:** AXIS Bank CSR
 - Delivered client-critical banking CSR system, enabling automated budget planning for **50+** partners.
 - Spearheaded the development of proposal initiatives ensured with project partners to manage their cash flows through annual budget planning and comprehensive requirement assessments.
 - Developed a structural workflow process based on role accountability for modules from initiator submissions and processing through subsequent levels.
 - *Technologies Used:* .NET Core 6, MVC Pattern, Stored Procedures, jQuery, AJAX.
 - *Staging Server URL:* [Axis Bank CSR Mitra](#)
- **Project:** Integrated Child Development Services
 - Developed a portal to digitalize and streamline operations for government-run ICDS centers, improving monitoring of health, nutrition and educational services for children.
 - Engineered a comprehensive child health & nutrition management portal supporting appointment scheduling, growth monitoring, and visit tracking per child, ensuring timely immunizations.
 - Built role-based digital workflows to manage registrations, re-admissions, follow-ups, and immunization records, improving transparency, for large-scale government monitoring.
 - *Technologies Used:* .NET Core 8, Database Indexing, Web APIs and MVC Pattern for Admin Portal.
 - *Staging Server URL:* [ICDS](#)
- **Project:** Moyyo Dating App
 - Led the development team for a dynamic dating app, overseeing the app's entire lifecycle.
 - Spearheaded development of complex user-matching algorithms, improving engagement and driving a **25%** increase in user retention during beta testing.
 - Implemented secure data transmission protocols & encryption, safeguarding user data & privacy.
 - *Technologies Used:* .NET Core 6, LINQ & Lambda, Third Party API Integration.

Innovate Tech

.NET Developer

September 2022 – April 2023

Kathmandu, Nepal

- **Project:** My Second Teacher
- Successfully migrated a legacy application from .NET 2.1 to .NET 6.
 - Resolution on bugs & issues perceived due to migration of applications which included compatibility issues, package versioning & third-party dependencies for external APIs.
 - Optimized database queries, reducing query execution by 40% improving overall response time.
- *Technologies Used:* .NET Core 6, LINQ & Lambda, ASP Boiler Plate, AWS Services (S3 Bucket and Lambdas)
- *Production Server URL:* [My Second Teacher](#)

InfoDevelopers

.NET Intern

June 2022 – September 2022

Kathmandu, Nepal

- Enhanced proficiency in C# & .NET Framework & gained hands-on insights with database management and data integrity with proficient ORMs, OOP and practices over industry based SDLC approaches.
- Initiated a knowledge-sharing session on the latest .NET features, enhancing the team's skills & expertise.

FREELANCING PROJECTS

Clock Bee

May 2025 – August 2025

- Designed a robust multi-tenant architecture using schema-per-tenant strategy via dynamic middleware-based tenant resolution and EF Core for database isolation and scalability.
- Led development of key modules including shift scheduling, timesheet tracking, payroll summaries, leave request approvals, and real-time notifications (via FCM).
- Staging Server URL: [Clock Bee](#)

Connect CMS

July 2024 - December 2024

- Led the development team for a web-based Blazor WASM Training Management System application.
- Oversaw API development, integrations and core business logic tasks to enhance the platform's functionality including inspection tests and analysis (Personality Tests, SWOT Analysis and Personal Assessments).
- Implemented dockerization of containers for hosting and deploying both the client and server side on a VPS via GitHub Actions along with CI/CD pipelines.
- Production Server URL: [Connect CMS](#)

EDUCATION

London Metropolitan University

Islington College - BSc (Hons) Computing

March 2021 – December 2023

Kathmandu, Nepal

- Graduated with **First Class Honors** and awarded with the prestigious AAA Scholarship for my stellar academics, unwavering attitude, and impeccable punctuality.
- Involved as a Student's Academic Representative (StAR) to act as a communication bridge between students & teachers along with facilitate in peer learning & academic support encouraging participations.

CERTIFICATIONS, SKILLS & INTERESTS

- **Web & Application Development:** .NET Core (6-8-10), React, NextJS, Blazor and React Native.
- **Database Management:** SQL Server, PostgreSQL, Entity Framework Core and Stored Procedures.
- **DevOps & Deployment:** Docker, GitHub Actions (CI/CD), Firebase Hosting, Firebase CI/CD Pipelines.
- **API Development & Integrations:** REST APIs, Swagger, Postman, Stripe & Firebase APIs.
- **Testing & Debugging:** Unit Testing, Debugging & Optimization, Code Reviews.
- **Other Tools & Practices:** Git (GitHub/ GitLab / Bitbucket), Multitenant Architecture, Hangfire, SignalR.
- **General Qualities:** Problem-Solving, Adaptability, Teamwork & Collaboration, Researching & Googling.
- **Interests:** Web Surfing; Big Data; IoT; E-Sports; Reddit.
